

Safari Park Fractions

To calculate the value of the whole by using unit and non-unit fractions.

When $\frac{1}{3}$ of the giraffes is 4, how many giraffes are there altogether?

When $\frac{2}{3}$ of the giraffes is 8, how many giraffes are there altogether?

When $\frac{1}{5}$ of the lions is 2, how many lions are there altogether?

When $\frac{4}{5}$ of the lions is 8, how many lions are there altogether?

When $\frac{1}{4}$ of the elephants is 6, how many elephants are there altogether?

When $\frac{3}{4}$ of the elephants is 18, how many elephants are there altogether?

When $\frac{1}{6}$ of the monkeys is 5, how many monkeys are there altogether?

When $\frac{5}{6}$ of the monkeys is 25, how many monkeys are there altogether?

Safari Park Fractions

To calculate the value of the whole by using unit and non-unit fractions.

When $\frac{1}{3}$ of the giraffes is 5, how many giraffes are there altogether?

When $\frac{2}{3}$ of the giraffes is 12, how many giraffes are there altogether?

When $\frac{1}{5}$ of the lions is 8, how many lions are there altogether?

When $\frac{4}{5}$ of the lions is 16, how many lions are there altogether?

When $\frac{1}{4}$ of the elephants is 7, how many elephants are there altogether?

When $\frac{3}{4}$ of the elephants is 30, how many elephants are there altogether?

When $\frac{1}{6}$ of the monkeys is 2, how many monkeys are there altogether?

When $\frac{5}{6}$ of the monkeys is 15, how many monkeys are there altogether?

Safari Park Fractions

To calculate the value of the whole by using unit and non-unit fractions.

You could fill in the bar models using counters or numbers.

When $\frac{2}{3}$ of the giraffes is 10, how many giraffes are there altogether?

When $\frac{3}{7}$ of the giraffes is 12, how many giraffes are there altogether?

When $\frac{4}{5}$ of the lions is 20, how many lions are there altogether?

When $\frac{3}{8}$ of the lions is 30, how many lions are there altogether?

When $\frac{1}{4}$ of the elephants is 15, how many elephants are there altogether?

When $\frac{3}{5}$ of the elephants is 39, how many elephants are there altogether?

When $\frac{5}{7}$ of the monkeys is 100, how many monkeys are there altogether?

When $\frac{5}{6}$ of the penguins is 55, how many penguins are there altogether?

Safari Park Fractions Answers

When $\frac{1}{3}$ of the giraffes is 4, how many giraffes are there altogether? **12**

When $\frac{2}{3}$ of the giraffes is 8, how many giraffes are there altogether? **12**

When $\frac{1}{5}$ of the lions is 2, how many lions are there altogether? **10**

When $\frac{4}{5}$ of the lions is 8, how many lions are there altogether? **10**

When $\frac{1}{4}$ of the elephants is 6, how many elephants are there altogether? **24**

When $\frac{3}{4}$ of the elephants is 18, how many elephants are there altogether? **24**

When $\frac{1}{6}$ of the monkeys is 5, how many monkeys are there altogether? **30**

When $\frac{5}{6}$ of the monkeys is 25, how many monkeys are there altogether? **30**
